

Project #2006-004-38 Phase 3 - OR 214: Front Street to Progress Way Sidewalk Improvements

The City of Woodburn is teaming with the Oregon Department of Transportation to construct a separated sidewalk on the north side of Hwy 214 to complete the connection from Front Street to Progress Way. The project limits begin at the Front Street ramp on the north side of Hwy 214 and extend eastward to the intersection of Progress Way where the project will tie into an existing sidewalk.

The proposed sidewalk will resemble the existing sidewalk on the south side of Hwy 214 with a retaining wall below the Front Street and Railroad overpasses. A raised pedestrian island will be installed at the intersection of the Front Street ramp and Hwy 214 to allow for safer crossing at this location. The project will also include upgrades to the existing ditch to provide more adequate stormwater treatment and will replace the existing guardrail on the north side of Hwy 214 with concrete barrier rail that matches the south side of the highway and is designed to current standards.

Construction is anticipated to begin Spring of 2010. Construction impacts will be minor and will consist of shoulder closures and periodic lane closures under flagging operations. Pedestrian traffic on the existing southern sidewalk will not be impacted.
